## TESTIMONIAL

I have worked with Padma for more than a year and was really impressed with her technical skills (Python/SQL). She is a quick learner and had clear understanding of the business requirements. She performed well on all the projects assigned to her and owned the processes end to end.

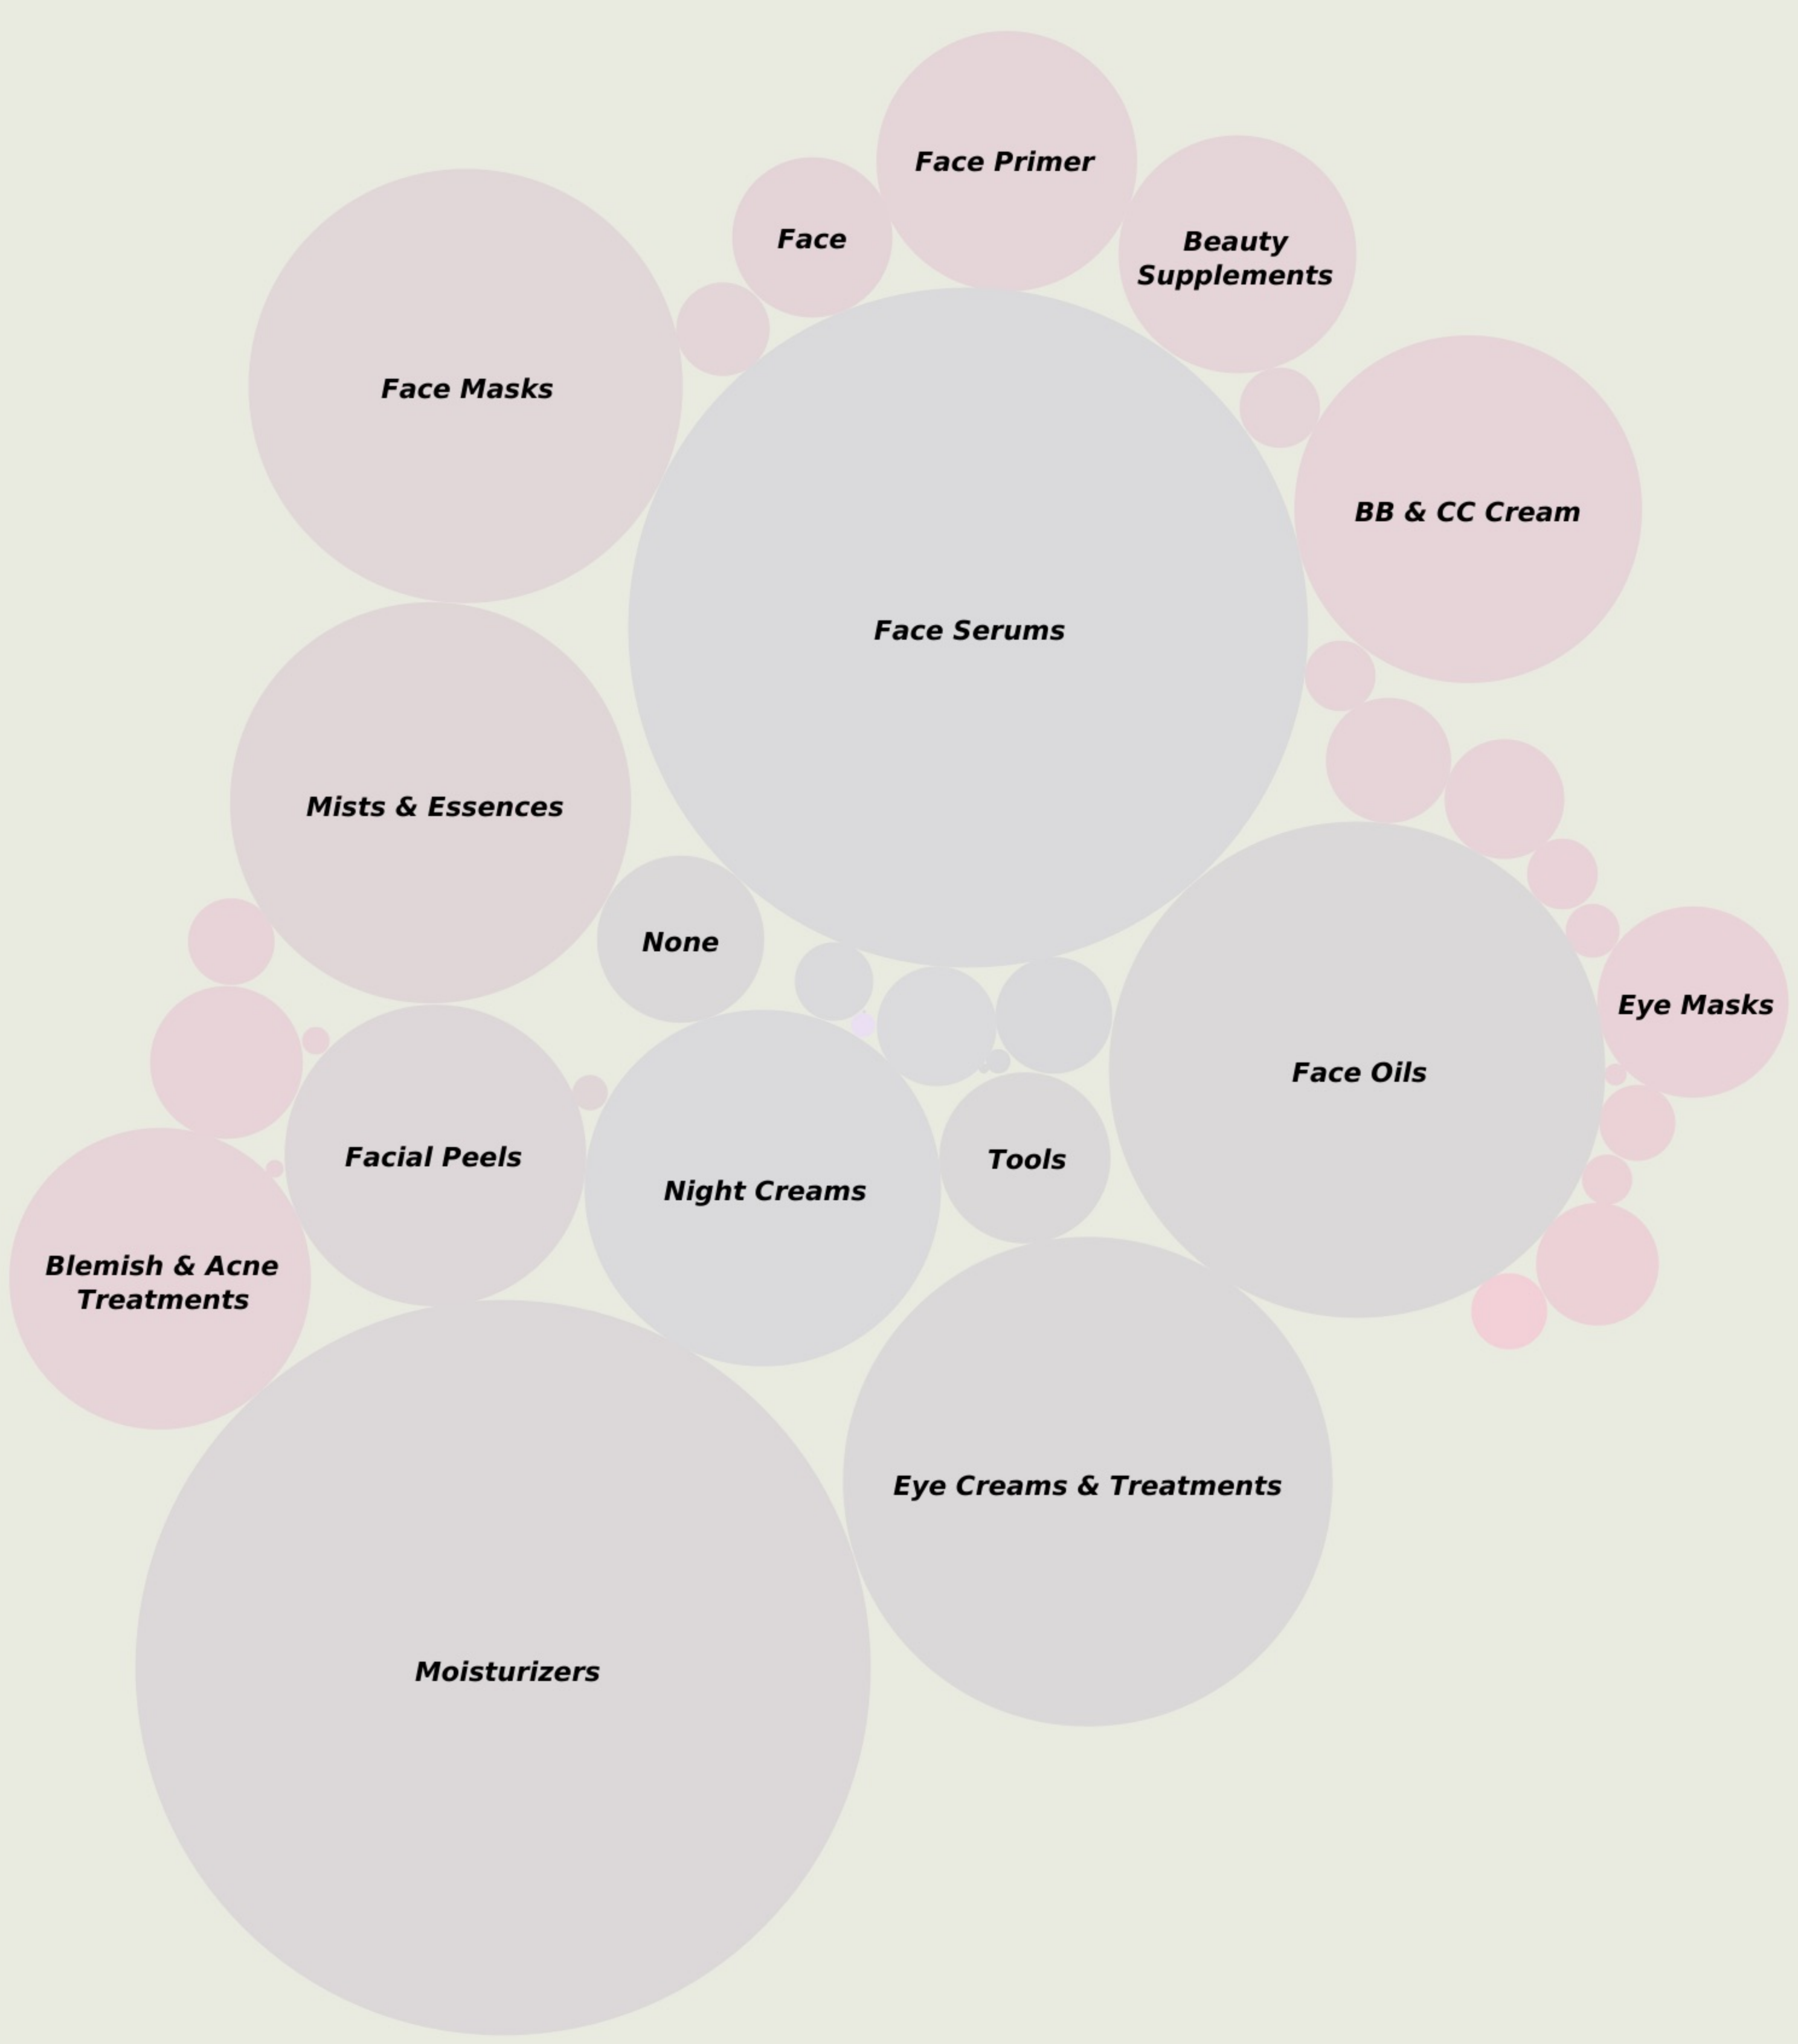

Overall Padma had a good repo with the client as well and handled all the tasks assigned to her efficiently. I look forward to working with her again in future.

My favourite ritual to do everyday is my skincare routine. Even though it's a theraputic and calming process. The cost of skincare products are especially very expensive. It takes me ample amout of research to find a good product that works for my skin. Having said that, I wanted to work on a skincare dataset that can provide me with some answers and find out which products are cheaper that also recieved love from the customers (similar to the reviews we see on other ecommerce website).

# OLYMPIC GAMES MEDAL HISTORY

AN OVERVIEW OF THE MEDALS RECEIVED FROM 1896 - 2016

## Most # of medals won

**Overview:** The first Olympics evidence dates back to 776 BC, and first Olympic Games were held every four years in honor of the god Zeus.

The event was banned by Roman emperor in 393 AD.

It was revived back in 1896 and since then the event consistently takes place every four years.

### What determines the # of medals in every Olympics?

Three important factors help determine the number of medals:

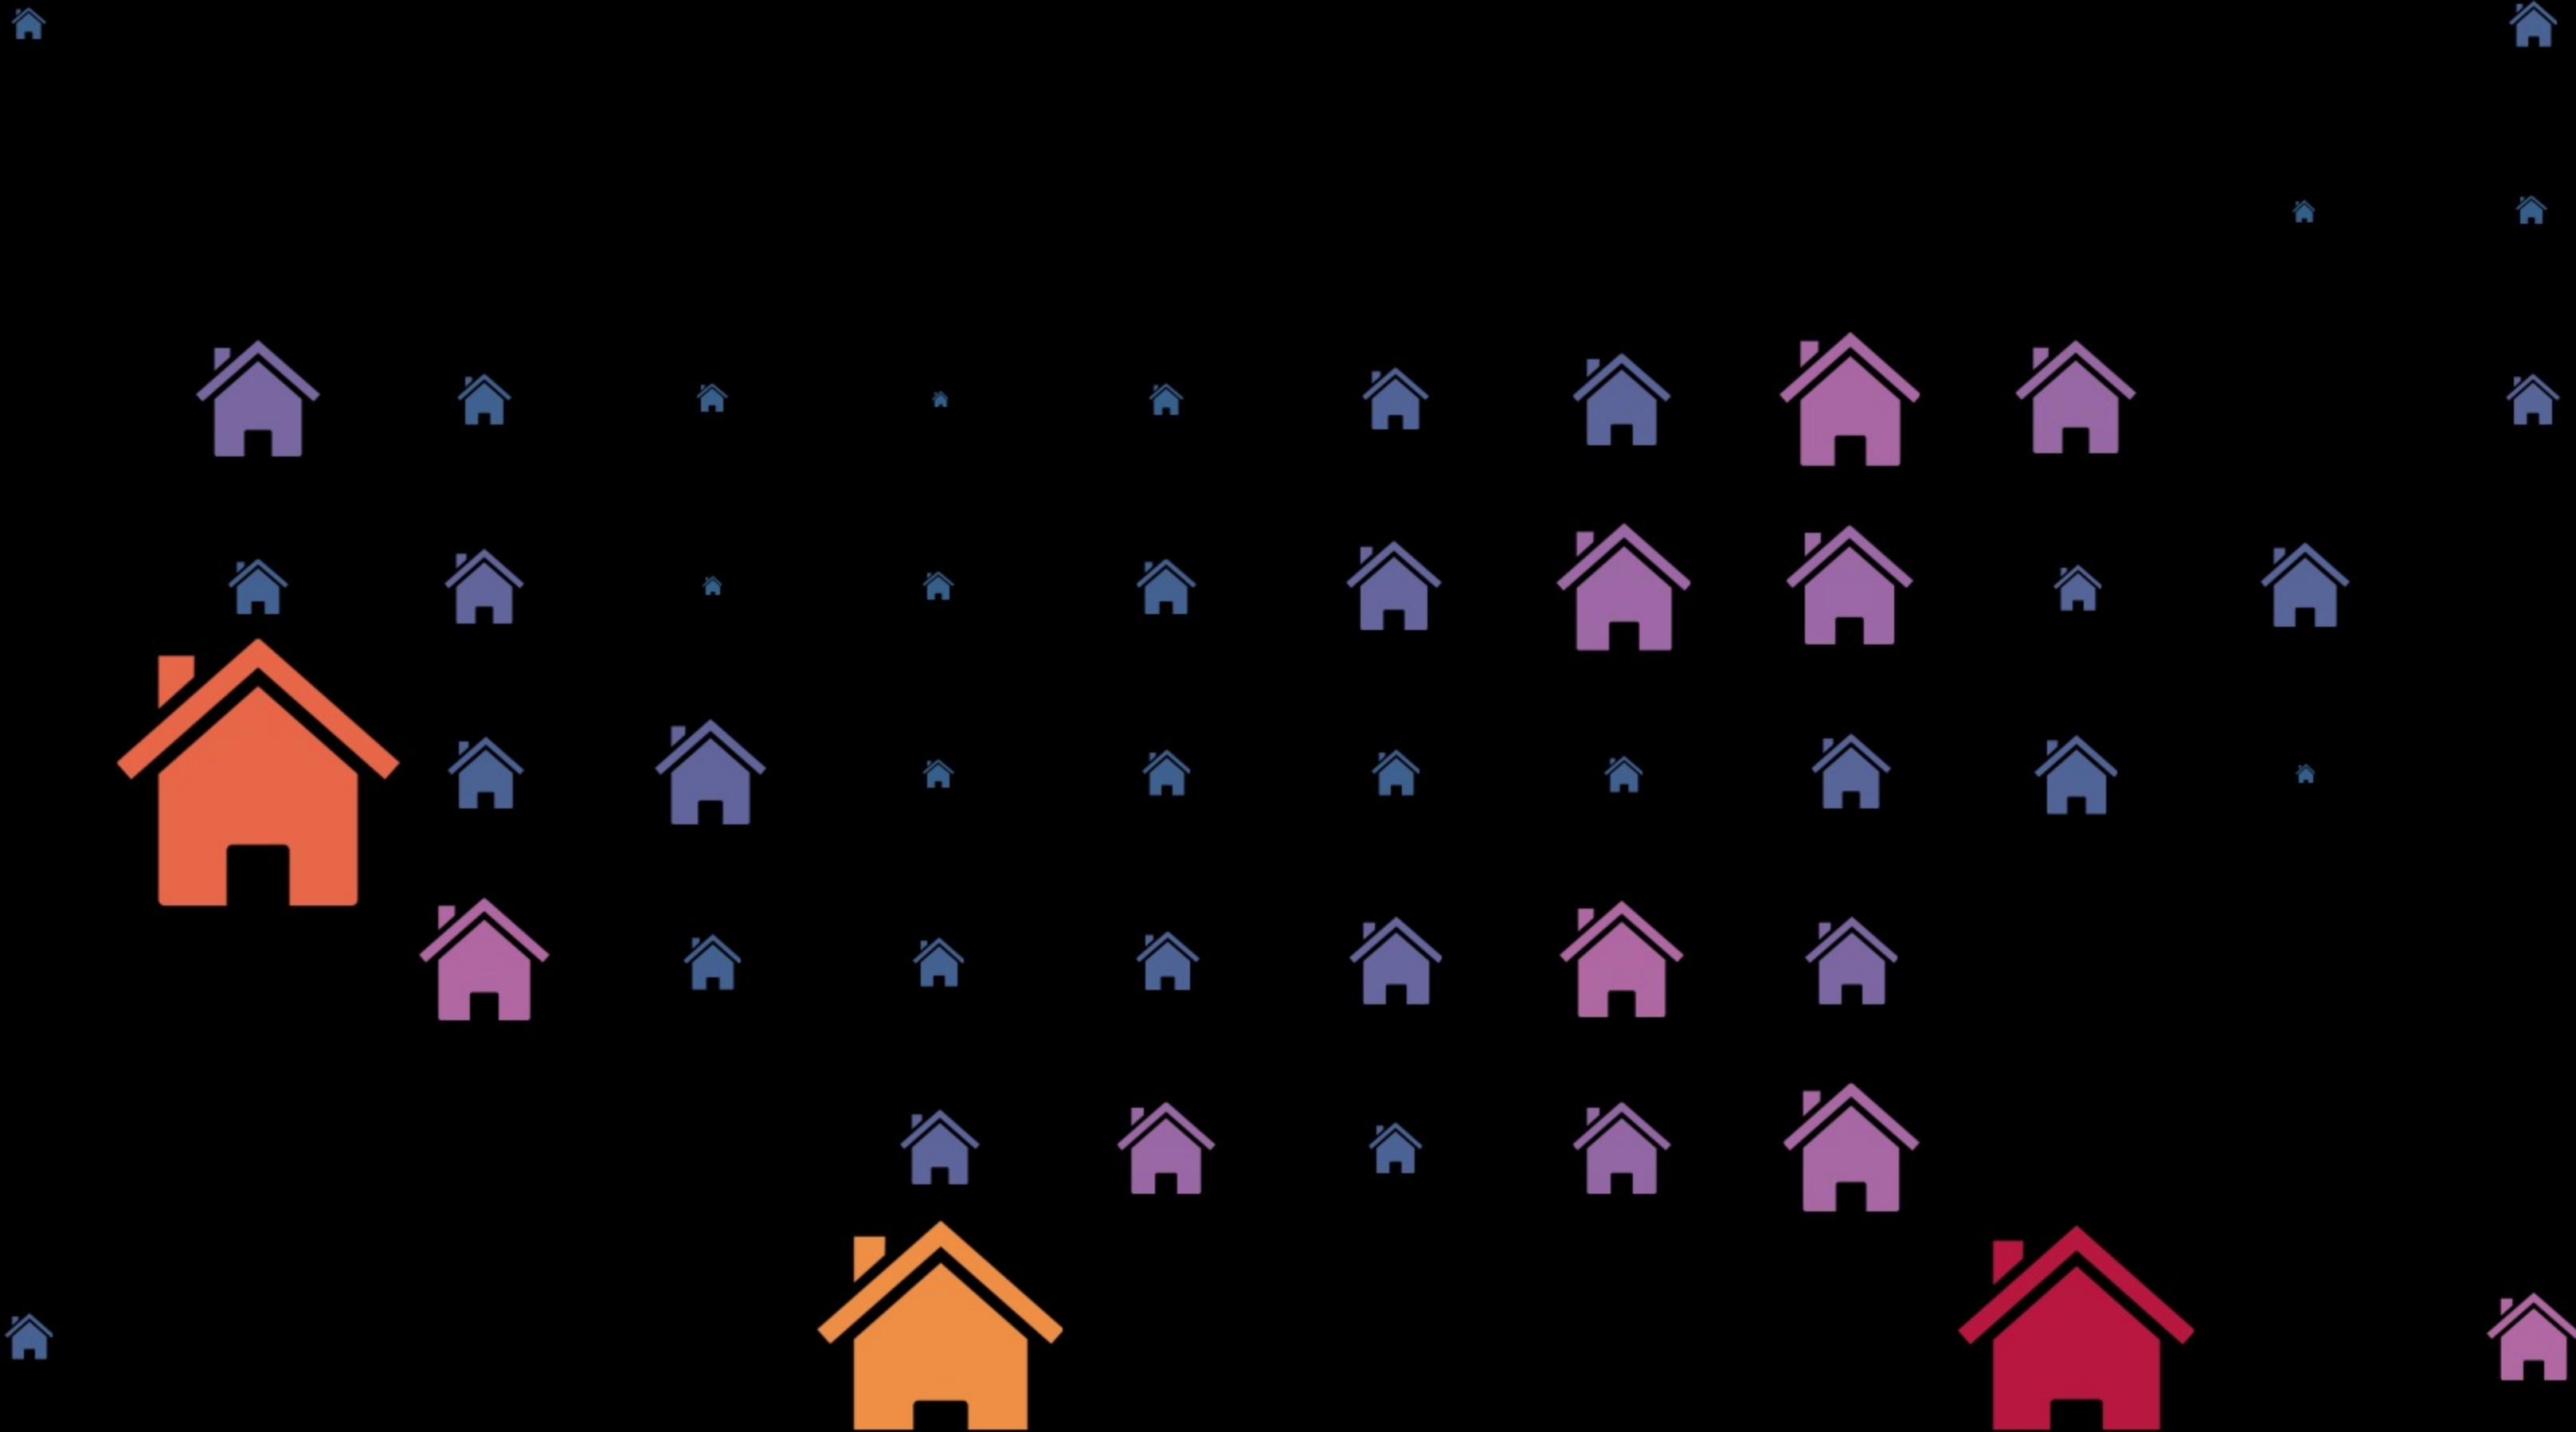

- Population size
- GDP per capita
- Host country
